SmartRisk

About SmartRisk

SmartRisk (PT.Solusi Manajemen Risiko Terintegrasi), which was established in March 2020, is a Joint Venture company with 90% ownership of Yayasan Pendidikan dan Kesejahteraan PT PLN (Persero) or YPK PLN which was established in 1993 and 10% of PT. Solusi Manajemen Risiko Terpadu (Smart) which was established in 2013. **SmartRisk** is engaged in managing risk management. We provide a comprehensive risk profile and assessment survey for all types of industries, especially for insurance needs. We also provide integrated solutions and services to develop or improve your company's operational risk management and safety management through consultation and training.

SmartRisk is committed to quality in every aspect of service through service standards, expertise and reasonable costs. We aim to be a worldwide risk management consultant and partner of choice in reducing your risk.

Our company's mission is to promote corporate awareness of risk reduction and work safety improvement by offering solutions to mitigate risk and support corporate loss prevention programs include financial losses, asset losses, labor, surrounding communities, the environment, image and reputation .

Our company is supported by a number of engineers and internal technical staff as well as experts with multi-disciplinary backgrounds with extensive experience and knowledge in the field of risk management and safety management, specifically in risk assessment of operational

assets, specializing in the following fields:

- Energy
- Agroindustry
- Mining
- Construction Project
- Communication & Technology
- High-Rise Building
- Port & Marine Cargo
- Insurance

In performing risk analysis, **SmartRisk** engineers adhere to national and international standards and guidance. Underpinned by several risk analysis software, we can also perform mixed qualitative and quantitative risk analysis, namely **Interwoven Method**, to present better understanding in risk profile of the evaluated facilities.

SmartRisk realises the fundamental value of experiment on forecasting and anticipating every possibilities in your business operation. Every step of the process help us to achieve a tremendous value of experience. By obtaining a wide range of experience, it given us the expertise to understand your business needs.

Consultation

Operational Risk Assessments

SmartRisk provides operational risk assessment for existing facilities for a wide range of industrial facilities. Each risk assessment will be performed distinctively based on agreed scope of work.

We generally provide these services for proposed or existing insurance arrangement. The outcome of these risk assessments can be benefitted to clearly recognise and communicate the thorough profile of assets at risk.

Our services can include:

Project Risk Assessment

The objective of the services is to help clients understand the risk associated during construction stages. The benefit of these services is to capture the risks and establish risk mitigation and prevention plans, thus can reduce costs of insurance premium during construction stages.

Asset Valuation

We provide asset valuation services to aid companies in managing insurance premium while ensuring adequate coverage by accurately reviewing the reinstatement value of its assets. **SmartRisk** has developed comprehensive costing databases for various industries, including oil and gas, fertilizers, textile, paper industries and mining, to assist us in determining correct value for any region in the world for any reasons. Our database is also related to many widely used published indices, such as Nelson Farrar, Marshall and Swift, and Chemical Engineering Index. Our services can include advices on types of values required, such as replacement as new value, market value, forced sale value, etc.

Consultation

Value Engineering Services

SmartRisk has adopted a systematic and organised approach of value engineering to improve efficiency of construction projects by providing the necessary functions at the lowest cost. Value engineering promotes the substitution of materials and methods with less expensive alternatives, without sacrificing the safety and functionality aspect.

Our services are focused on:

- Analysing the functions of various components and materials, rather than their physical attributes
- Determining the relative importance of each function
- Measuring all the cost accurately
- Improving the efficiency by reducing high-cost components of little added value, and substituting with components that contribute significantly to the necessary functions

Risk Management & Insurance Planning

SmartRisk provides risk management and insurance planning services for any organisation to review their risk management strategies and risk transfer measures. With expertise in insurance field, our engineers can bridge the coordination between technical and finance department by unbiased study on technical risk management measures and related insurance practices. These services will help the management to manage the risk effectively and profitably.

There are various types of insurance available in insurance market with lot of restrictions within the coverage offered. Our experts can analyse and recommend proper insurance protection based on assessments to prevent uneconomical and inefficient risk transfer costs.

Business Continuity & Sustainability Studies

An organisation needs to be prepared for a challenging nature, whether caused by natural hazards or catastrophes, while keeping business operations going. **SmartRisk** can provide assistances for implementing business continuity management systems and standards to support the business in the event of a major (or minor) catastrophe. By putting business continuity plan in place, your company incorporate methods to enhance sustainability which can be both cost-effective as well as environmentally friendly.

Third-Party Exposure & Loss Control Advisory

Any major incident or accident could possibly exposed surrounding communities to hazardous situation. If not recognised thoroughly, third-party liability could arise from that situation. **SmartRisk** provide broad analysis of surrounding area, and proposed effective mitigation measures to lessen the impact of catastrophes to third-parties in the neighbourhood.

Disaster Risk Reduction

As disasters can impact both industrial facilities and surrounding communities, our stakeholders need to ensure the capabilities of all elements to carry out proper emergency responses in the event of disaster. **SmartRisk** offer complete solution for disaster risk reduction initiatives by providing systematic management of administrative decisions, organizations, operational skills and capacities to implement policies, strategies and coping capacities, when disaster strikes.

Engineering & Hazard Studies

Our services offer a complete scope of pre-studies services to identify and evaluate credible process related hazards, assess adequacy of existing safe guard measures and recognize additional risk reduction opportunities.

The economic consequence of an effective risk management systems results in fewer accidents, improved profitability, optimum reliability, lower insurance costs and lower expenses related to catastrophic incidents.

Consultation

Fire Risk Management

The Fire Risk Management has been widely adopted by industries worldwide by adhering to various standards and guidelines. We offer the comprehensive solution for NFPA compliance and implementation of company-specific requirements by identifying possible fire hazards, assessing fire risk, analysing and suggesting possible mitigation measures to reduce fire risks as low as reasonably practicable (ALARP).

Process Safety Management

The Process Safety Management (PSM) of Highly Hazardous Chemicals (HHC) standard has been the primary guideline for programs designed to prevent or minimize the consequences of catastrophic releases of HHCs. We provide assistances to implement PSM programme that comply with regulatory requirements. Generally, the advisory includes all PSM elements, although it can be tailored to suit your unique needs.

Business Research

The end to end services from **SmartRisk** begins with study and research, which aims to understand the current state of the client's organization. This study can be in the form of customer loyalty surveys, employee engagement surveys, and field observations. The research process becomes the **SmartRisk**'s foundation in providing recommendations, according to the goals and needs of the organization.

HSE Consultancy Services

- Performance Development – Integrated Management System of QHSE (e.g. QHSE Management System, SMK3, OHSAS Performance Evaluation)
- Improvement Action Plan for PROPER LH
- Improvement Action Plan for ISRS (International Sustainable Rating System)
- The internal company procedures of Contractor Safety Management System (CSMS) Development
- The emergency response procedure and plan Development
- Planning of Fire Protection Design
- Accompaniment in pre fire planning and emergency drill simulation
- Accompaniment in Incident Investigation implementation (major incident e.g. fire or fatality accident)

HSE Culture Research

The survey aims to measure the position or level of corporate culture in HSE aspect, as follows:

- Psychology aspect
- Behaviour aspect
- Circumstance aspect

Other Consultancy Services

We also offer other services that includes but not limited to:

HSE Audit

- A. Assessment
- Hazard Identification & Risk Assessment
 - HAZOP study
 - Fire Assessment (Evaluation of Fire Protection System)
 - Survey HSE aspect in construction stage (EPC) – High Risk Building, Production Facility e.g. SPBU, SPPBE, Terminal LPG, Terminal BBM, etc
- B. HSE Audit
- Performance Audit of QHSE Management System
 - The second party Audit for CSMS implementation
 - Performance Audit of HSE for plant facilities, e.g. SPBU, SPPBE, Terminal LPG / BBM, Manufacture Industry, etc

- Fire & Explosion Risk Assessment
- Fire & Explosion Investigation
- Fire & Explosion Protection Design System
- Forensic Engineering Investigation
- Dust Explosion
- Process Hazard Analysis (HAZOP, SIL, LOPA)
- Human Capital Maturity Level Assessment
- Organizational & Human Resources Transformation
- Integrated Performance Management

Learning Centre & BNSP Certification

Training

The purpose of our training is to understand the risk associated with each company and implementing appropriate prevention program that could minimise the risks and increase the productivity.

SmartRisk Learning Centre provides best services for trainees to provide field experience to all participants, we conduct simulations by using toolkits, tools and practices needed for training demos. Participants get a hard copy and soft copy of training materials as well as information or references that are relevant to the topic of training.

Certification

As regional and global markets grow and expand, there are more companies seeking partnership with skilled, reliable, and safety aware clients. To ensure those quality, **SmartRisk** provides extensive accreditation and certification services.

We are affiliated with Indonesian National Board of Professional Certification (BNSP) in establishing our own competency assessment centre (TUK).

We also established cooperation with Prosafe Indonesia providing professional HSE Training and Certification by OSHAcademy.

OHSE (Occupational Health, Safety & Environment) Training

A. Training & BNSP Certification

- Training & Certification of Occupational Health & Safety Expert (Ahli K3 Umum Muda, Madya, Utama)
- Training & Certification of Occupational Health & Safety in Oil & Gas (Operator, Supervisor, Main Supervisor)
- Training & Certification of Safety Man in Oil & Gas
- Training & Certification of Authorized Gas Tester
- Training & Certification of Safety Inspector
- Training & Certification of Auditor in Management System of Occupational Health & Safety (SMK3)
- Training & Certification of Incident Investigation

B. Expertise & Awareness Training based on tailor-made

- Basic Fire Fighting
- HSE Leadership
- Behavioral Based Safety (BBS)
- Implementation of Contractor Safety Management System (CSMS)
- Hazard Identification-Risk Assessment & Determine Control (HIRADC)
- Hazard Operability study (HAZOPs)
- HSE Planned Inspection
- Authorized Permit to Work (Gas Safety Inspector)
- Emergency Preparedness & Response Plan
- HSE Training for Manager of Gas Station and Filling Station (SPBU & SPPBE)
- Training for Safety Man of Gas Station and Filling Station (SPBU & SPPBE)

Learning Centre & BNSP Certification

Insurance-related Training

It is necessary for risk management personnel to grasp more advanced and technical aspect related to the insurance industries. **SmartRisk** insurance-related training courses including but not limited to: Fire Insurance, Business Interruption Insurance, Contractors Insurance, Liability Insurance, Property and Casualty Insurance, Marine Hull Insurance, and also Marine Cargo Insurance.

Risk Management Training

A. Training

- Training Needs Analysis
- Project, Program & Portfolio Management
- Enterprise Risk Management based on ISO 31000:2009 Risk Management International Standard
- Risk Management for Asset Management Company
- Risk Based Audit (RBA)
- Project Risk Management
- Business Continuity Management based on ISO22301:2012
- We can tailor made training program based on client needs within our expertise

B. Training & BNSP Certification

- Certified Energy Risk Associate (**CERA**)
- Certified Energy Risk Manager (**CERM**)
- Certified Energy Risk Chief Officer (**CERCO**)

People Development

We will assist organizations in determining the suitable human resource development programs. We also assist organizations in developing Corporate Universities, especially in developing academies within organizations.

Type of People Development Training:

- Services
- Sales
- Leadership
- Excellence

Process Improvement

Aside from people development, we also support our clients in implementing continuous process improvement. We connect operational excellence with service quality. Improving process means delivering better service, leading to an increased customer satisfaction. Six sigma lays out the thinking process through data-driven, statistical analysis that aims to transform companies into leaner organization by saving cost and optimizing efficiency.

Digital Learning

We dedicate our e-learning team to develop digitalized learning content for our clients. We deliver both customized and off the shelf (ready to use) learning program to suit client's needs. Our team are experienced in developing more than 1500 learning hours for the past ten years in both e-learning and mobile learning platform.

IT Solution

IT solution provide tools or applications to carry out practical analysis and measurement using the basic data that we have.

IT Project Management

Project management that is appropriate to the specific conditions in the company being managed, both in terms of time, cost and quality.

- IT Project Management & QA
- Green & Smart Building
- Document Management
- Dashboard Management System (DMS)

Big Data & Analytic

Carry out structured and systemized data analysis processing for the productivity and effectiveness of the company's business activities.

- Big Data Consulting
- Big Data Implementation
- Big Data Training & Support
- Big Data managed Analytics Services

Big Data Analytic technology helps companies make faster and better decisions, and is very effective to avoid mistakes in decision making.

Tim Ahli

Djoko Mulyadi

Djoko Mulyadi is a practitioner and trainer in the field of electricity. He worked at PT PLN (Persero) from 1985 to 2014, specializing in transmission and distribution. He holds certifications as an assessor in the fields of power generation, transmission, and distribution. He is also certified as an Electrical Occupational Health and Safety Expert, a Principal Expert in Electrical Power Construction, and PLN Instructor.

Currently, Djoko Mulyadi is a Trainer and Technical Professional at SmartRisk

Joga Prakasa Subroto

With a background in Industrial Engineering, Joga Prakasa Subroto began his career as a Valuer at PT Synergy Risk Management Consultant. He has extensive experience in valuation and risk assessment since 1997, particularly in the oil and gas sector. He served as a Senior Valuer at PT Javanex Valuindo Consultants from 2005 to 2010. In May 2010, he became Director of PT Briskindo Konsultan. Joga Prakasa Subroto is currently a consultant at SmartRisk.

Winardi Sani

He possesses extensive knowledge and experience as an academic and industrial engineer for over 20 years. Drawing on his industrial background, he synthesizes academic programs and industry needs in the planning, delivery, assessment, and evaluation of education and training effectiveness, particularly in the downstream oil and gas sector. He is also a reviewer for international research journals in aerospace engineering and an active member in promoting green project management. Winardi Sani is currently a Technical Professional at SmartRisk.

Adrianus Pangaribuan

As a professional Forensic Engineer, Adrianus Pangaribuan has extensive experience in Fire and Safety Engineering, with numerous certifications and professional memberships. Adrianus has conducted Fire and Explosion Risk Assessments for various industries, with a particular focus on fire and explosions (dust explosions). In 2007, he completed a Postgraduate Program in Fire and Safety Engineering from the University of Indonesia and has held a Doctorate degree since 2018. He is currently an Advisor and Technical Professional at SmartRisk.

Sumyartono

Having extensive experience in the insurance sector before 2007, Sumyartono obtained his Certified Risk Management Professional (CRMP) certification in 2010 and specializes in risk management, particularly in technical and business development. He is currently a Technical Professional and consultant at SmartRisk.

Tri Harso Harijadi

With a background in engineering, Tri Harso Harijadi has extensive experience in HSE for over 30 years. In 1992, he earned a Diploma in Health & Safety Management from the British Safety Council, London. Tri Harso was appointed as Pertamina's Corporate HSE Fire Protection Specialist between 2010 and 2012. He also received an award as an Agent of Transformation at Pertamina's Marketing and Trading Directorate in 2007. He is currently an HSE Instructor and Technical Advisor at SmartRisk.
